

Fully Automated Cell Manufacturing Instrument

CellQualia™

INTELLIGENT CELL PROCESSING SYSTEM

On-site Demonstration Tour

in the Solution Lab at the Kobe Center for Medical Innovation (KCMI)

Free of charge

Dates

March 19^{Thu} / 20^{Fri} / 21^{Sat}

Time slots

9:00 / 10:30 / 13:30 / 15:00

Estimated duration: 30-60 minutes

Overview of the Tour

Capacity Up to 6 participants per session (first-come, first-served)

How to apply To register, please visit our booth (B-101) at the 25th Annual Meeting of the JSRM or complete the online application form.

Schedule Meet at the 2nd-floor lobby of KCMI, followed by a device tour and Q&A session at our laboratory, and concluding on site.

Please note that, as the tour is filled on a first-come, first-served basis, we may not be able to accommodate your preferred date and time.

Application form

Access to the Venue

Kobe Center for Medical Innovation (KCMI)
6-3-5 Minatojima-Minamimachi, Chuo-ku, Kobe 650-0047, Japan

Our Solution Lab on the 5th floor of KCMI is a facility where we routinely conduct equipment tours and demonstration cultures of the ICP System. Since this year's JSRM and JSRM-ISCT conference venue is located only about four minutes away by Port Liner, this event offers a rare opportunity to see our automated cell culture system in operation. We warmly invite you to take this opportunity to join the on-site demonstration tour and experience the CellQualia Intelligent Cell Processing (ICP) System firsthand.

Access (Port Liner)

Travel expenses are the responsibility of the participant. Please use public transport or taxi as no parking is provided.

Exit the ticket gates at the Port Liner "Keisan-Kagaku Center Station" and proceed toward the North Exit (to the left).

The building directly in front of you is the Kobe Center for Medical Innovation (KCMI), the venue for the tour.

Walk straight ahead and enter through the main entrance.

Please gather near the sofa seating area in the entrance hall, where our staff will meet you.
